ANNUAL REPORT
OF
The School Board.

To the parents and guardians of our children, and to those who pay taxes for the support of our public schools, the School Board beg leave to submit the following report :

As a class, the schools have been provided with good, competent teachers, the scholars making rapid advancement, considering the shortness of the terms. In some schools the attendance has been very irregular, the fault being with the parents, as usual.

We can truly say that all our teachers have been faithful ; we do not mean that any one has done every thing better than any other teacher would have done in the same place, but she has done something better than we, who have been looking on, could have done, even if we do think we should have acted differently, as we no doubt should, according as our qualifications and dispositions differ. With a teacher who is interested in the work, scholars can surely improve, and if there are any who have not spent their time to good advantage, part of the fault has been in themselves.

Owing to the lack of proper accomodations it is at present impossible to give entire satisfaction in that part of the town known as the Cater district. Something should be done at once that a school may be held in that district.

All of the school houses need repairs. In many there are not seats enough to seat all of the scholars properly. There also might be an improvement in the manner of lighting our

school houses. In many of them the sun shines on the books of the scholars in the afternoon and it is impossible to study in such a light. We would suggest that curtains would supply sufficient shade and not darken the room. Under existing circumstances the school board has sometimes found difficulty in determining what might be the right thing to do and we hope the time is not far distant when some final arrangement may be made that will prove satisfactory.
